PRESS RELEASE SEPTEMBER 2016

NINA CAMPBELL AUTUMN 2016 FABRICS & WALLPAPERS

COROMANDEL FABRICS & WALLPAPERS

Nina Campbell presents an enticing collection of decorative fabrics and wallcoverings, inspired by different continents and periods of history for contemporary international interiors. Indigo features prominently in Nina's colour palette as do coral, aqua, chocolate and teal combined with quieter tones of stone, charcoal and ivory.

MARDI GRAS fabric – The flamboyance of a Caribbean island festival is evoked in this large-scale embroidered chevron of variegated colour on linen union.

"A joyous design, with a carnival spirit, we've used colourful embroidery, held together with neutrals, I love the combination of the coral, yellow and charcoal." NC

MEREDITH fabric and wallpaper – Nina's classic damask is refreshed in soft, contemporary colourings.

"We first introduced Meredith in the early nineties, she's now re-born in fresh new colours, such as pretty sage green, a fashionable indigo blue, and my favourite, coral, she will look lovely adorning a sofa." NC

CALYPSO fabric – A semi-plain composed of small polka dots which create an ombré effect across the width of the fabric, evokes the rhythms of the Afro-Caribbean music.

COROMANDEL fabric and wallpaper –

An embroidered floral trail of Indienne origin is given a modern interpretation with shiny viscose yarns on contrasting linen grounds as fabric, or metallic inks as wallpaper.

"I wanted to produce a tree-of-life design, that wasn't too floral, the wallpaper is brought to life with metallic inks, that will reflect and play with the light in a room, the rich dark colourways offer drama and will look wonderful in libraries and hallways." NC

PAVILION GARDEN fabric and wallpaper – An enchanting scene of elegant sari-clad ladies in a blossom laden garden.

"This design was inspired by a document, its full of character... and naughty monkeys!" NC

PERDANA fabric and wallpaper – A delicate composition of ornamental branches in flower, depicted in a delicate painterly style to appear like stitches, the fabric has the addition of exotic birds.

PALMETTO fabric and wallpaper – Large scale tonal palm leaves form elegant columns.

"Inspired by vacations in the Bahamas, we started with a classic combination of green palm leaves set against a blue sky. I love the architectural quality of the design, especially in the charcoal and stone." NC

VIGNOLA wallpaper – An ornamental ogee trellis composed of tiny beads, in metallic silver and gold.

GIOCONDA wallpaper – A spot motif printed in flock with a contrasting coloured outline.

CONCERTINA wallpaper – A trompe l'oeil stripe echoes pleated silk fabric.

GIOCONDA

Nina Campbell presents a collection of glamorous fabrics, featuring metallic effects, such as foil, shiny embroidery and satin weave. Colours include chocolate, topaz, aqua and coral embellished with silver, gold and bronze.

UMBRIA

The Italian region famed for its medieval and Renaissance hill towns lends its name to this collection of relaxed textured fabrics with geometric designs, which are suited to both classic and more informal decorating schemes. The restrained colour palette includes eucalyptus, silver, beige and taupe with stronger tones such as bitter chocolate, teal and red.
